

CNHRPC maintains a wealth of natural resources, municipal, transportation, demographic, and other socio-economic data that can be displayed on maps. Some of these layers include:

Natural Resources

- Soils
- Wetlands
- Conservation & Public Lands
- Native Ecosystems
- Digital orthophotos

Municipal

- Tax parcels (where available)
- Infrastructure (sewers, storm water drainage system, critical facilities, etc.)
- Zoning

Transportation

- Public transit routes
- Traffic Counts
- Roads with names and statutory, regulatory, and traffic engineering attributes

For more information about GIS or data services, please contact [Craig Tufts](#)

GIS Services at the Central New Hampshire Regional Planning Commission

Welcome to the GIS & Data Section

Last Updated Tuesday, 24 January 2012 12:44

CNHRPC provides GIS Services to its 20 member communities, and Federal, State and local agencies. CNHRPC has two employees that work on GIS projects. The services include extensive mapping, GIS Analysis, GIS Data creation, and update and maintenance for projects including open space plans, master plans, hazard mitigation plans, zoning updates, tax mapping, road base maps, and many others.

CNHRPC has received an ESRI Conservation Program grant for GIS Software.
